

We have a great opportunity available for a Quality Assurance Engineer. You will be responsible for providing quality assurance for a range of software solutions. This role will focus on software testing to improve first-time quality and accuracy, and you will be responsible for improving processes and methods. This role will drive improvements at all stages of the software development lifecycle.

Responsibilities

- Develop testing methods, and use tools that cover the whole lifecycle of a product
- Accountable for all software quality-related metrics
- Responsible to provide technical investigation updates/progress to project team, technical staff, and users
- Create and execute regression tests based on design specifications and requirements
- Collaborate with developers and support teams in establishing, integrating and adapting processes as needed
- Assess and modify requirements for the purpose of creating test cases
- Support user-acceptance testing as necessary

Requirements

- 4-year degree or equivalent experience
- 4+ years experience in a software-testing role with experience providing functional and quality assurance support to development environments with increasing responsibility
- Ability to clearly communicate highly technical information to both internal teams and business partners
- Team and solution oriented
- Highly adaptable, flexible, and able to prioritize multiple tasks in a fast-paced environment
- Ability and desire to learn new technologies and testing techniques
- Proven understanding of quality principles and practices, and structured testing methodology
- Maintains strong attention to detail even during high-pressure situations
- Strong time management skills and ability to meet deadlines
- Highly self-motivated and directed
- Experience with test management tools, issue tracking tools, and automated test tools
- Experience with application architecture, and familiarity with .NET, SQL, and web services
- Proven experience in creating and executing test plans

Why Tecuity?

- An excellent work environment, working with a results-driven team building an exciting future.
- Benefits include:
 - Medical/Vision/Dental Insurance
 - Paid Time Off (Holidays, Vacation, Sick)
 - 401K with Company Match
 - Life Insurance
